I am a full-stack developer driven by curiosity and skilled in enhancing customer experience. I consistently seek innovative solutions to address unique project requirements and have a strong passion for learning new technologies. Collaborative and deadline-oriented, I excel in team environments and am committed to delivering high-quality results on time.

PROJECTS

Getchup

A mobile application that helps users with ADHD enhance their focus and productivity through attainable daily goals and smart reminders.

React, Gluestack, EC2, NGINX, Docker, OpenAI

Lumière

Web application designed specifically for salon businesses to efficiently manage their inventory using cloud technology, keeping track of stock level and minimizing product wastage.

React, Material UI, AWS, MongoDB

AniHelp

A web app that streamlines the process of reporting a sick, injured or dead animal, by determining the best suited care facility based on the user's location; therefore increasing the efficiency of the process and enhancing animal rescue results.

HTML, Sass, Javascript, Bootstrap, Firebase, TomTom

GeneroCity

Conceptual project of a mobile app of an exchange marketplace.

EXPERIENCE
